

# WHICH ONE IS BETTER

laptop

Desktop

VS

## cost

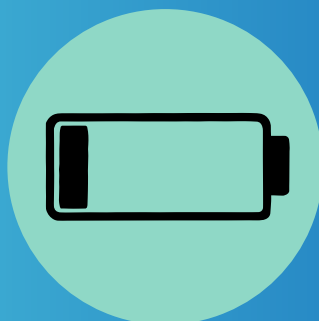

A laptop will almost always cost more than a desktop with performance specifications.

Desktop computers are generally less expensive overall and offer a better value.

## BATTERY

A laptop is a rechargeable device that supplies power to a laptop computer.

A desktop isn't portable so doesn't really have a need for batteries.

## Game

you don't need to buy a separate monitor, keyboard or mouse. you might not even need to buy a headset

Desktop provides advanced hardware customization options, versatility and often better multiplayer options.

## Repair

Although they don't contain as many standard parts as a desktop computer most parts can be replaced and some can be upgraded

Desktop repair is working on computer which are either towers flat desk-top cases custom built pc and even some
